The question of why and how certain individuals are drawn towards behaving in a way that contravenes the Law of the Land is not an easy one to address. Researchers from various different fields have nevertheless attempted to develop theoretical explanations for the existence of different types of crime and why some individuals commit such acts. Crime and Criminality draws on criminology, sociology, psychology and neuroscience to offer a balanced perspective of crime, the criminal and criminality. Coverage includes: * a comprehensive discussion of theoretical approaches to criminal behaviour, including biological, social and rational choice approaches; * an analysis of legal and social definitions of crime and how these definitions influence the way specific behaviours are labelled as criminal; * an examination of different types of crime and criminals, from delinquents to psychopaths and sex offenders; * an exploration of different ways in which crime is predicted, including risk assessment and offender profiling and an overview of investigative techniques.
